

## About US

GP guide app is designed for the General PR actioners and MBBS doctors particularly intern doctor. This app contains 'Management Guideline of Medical Diseases' e-book, pediatric drug dose calculator, pregnancy drug index and common side effects of drugs and their management.

Practical management is a little differs from that of theoretical management. In our country there are few books to learn practical management of medical diseases. 'Management Guideline of Medical Diseases' books were written to cover the practical management of all the subjects of General Practice e.g. Medicine, Gynecology & Obstetrics, Pediatrics, Dermatology, Ophthalmology etc. GP guide app is the digital version of the 'Management Guideline of Medical Diseases' book. Besides the book more features was added in this app i.e. pregnancy drug index, pediatric drug dose calculator and common side effects of drugs and their management. This app will be also very much helpful for the intern doctor to work smoothly in ward.
